***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **1-15**, drawn to a method for manufacturing a coil for use in a charged-particle-beam apparatus, classified in class 427, subclass 116.
- II. Claims **16 and 17**, drawn to a method for manufacturing a coil for use in a charged-particle-beam apparatus, classified in class 205, subclass 118.
- III. Claims **18-22**, drawn to a method for manufacturing a coil for use in a charged-particle-beam apparatus, classified in class 216, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, and different effects.

Group I is directed to an electroless plating method.

Group II is directed to an electroplating method.

Group III is directed to an etching method.

Electroless plating, electroplating and etching are distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject

matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
